

Ideation Phase

Define the Problem Statements

Date	22 July 2026
Team ID	
Project Name	India's Agriculture Crop Production Analysis
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	<i>Describe customer with 3-4 key characteristics - who are they?</i>	Describe the customer and their attributes here
I'm trying to	<i>List their outcome or "job" the care about - what are they trying to achieve?</i>	List the thing they are trying to achieve here
but	<i>Describe what problems or barriers stand in the way - what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	<i>Enter the "root cause" of why the problem or barrier exists - what needs to be solved?</i>	Describe the reason the problems or barriers exist
which makes me feel	<i>Describe the emotions from the customer's point of view - how does it impact them emotionally?</i>	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	But	Because	Which makes me feel
a traveler	book flights on my phone	it takes a long time	the website is not responsive and doesn't have a mobile version	Frustrated

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
------------------------	-----------------	---------------	-----	---------	---------------------

PS-1	A smallholder farmer in central India growing rice and wheat on a small landholding	Decide which crops to plant each season to get the best yield and income	I don't have easy access to reliable, localized data on rainfall, soil health and market prices	Agricultural data is scattered across many government portals and isn't broken down to my district level	Uncertain and anxious about crop planning every season
PS-2	A state-level agriculture policymaker responsible for allocating resources across districts	Identify which districts need support (irrigation, subsidies, seeds) most urgently	I lack a single consolidated view of crop production trends and what's driving them across the state	Yield, weather and economic datasets exist in separate silos and require manual effort to correlate	Overwhelmed and slow to make timely, targeted policy decisions
